

**"Oman" - Independent Artist (Robot)
A Media Art Project by
Francis Wittenberger & Boris Svirsky**

in special collaboration with:
Skukandar Kartadinata,
Birgit Schoene,
Michael Mikina,
Peter Revill

Oman personality is a set of possible behaviors & reactions generated and executed across different situations Oman finds it self in. In a middle of Oman personality is it's character - self concentrated being of comedian artist who almost never understand perfectly what is going around him, and so those misunderstandings, as they lead Oman to wrong conclusions and reactions are a reason for continuous amusement to everybody around Oman, amusement to be released with humor & laughter, as after all Oman is a nice robot for whom people fill sympathy and want to help.

Because Oman is an art-career oriented being, and so it always has a plan for future, where Oman wants to go, what it wants to express and whom it wants to meet, In case communication failed to its server, Oman is still on it's way, in it's Odyssey on Earth.
